**Chinasoft Establishes Strategic Partnership with
SZ Kai Hong and Qingdao Guochuang to Promote Disruption in
Smart Household Appliance Industry Through OpenHarmony**

Chinasoft International Limited (hereafter referred to as “**Chinasoft**” or “the **Company**”) published this Announcement as a voluntary announcement to allow the public to know the latest information of the Company.

The Company hereby announces that it has recently entered into a strategic cooperation agreement with SZ Kai Hong Digital Industry Development Co., Ltd. (hereafter referred to as “**SZ Kai Hong**”) and Qingdao Guochuang Intelligent Household Appliances Research Institute Co., Ltd. (hereafter referred to as “**Qingdao Guochuang**”). The three parties will focus on the development towards high-end, smart, and scenarized orientation for household appliances strategic cooperation. Driven by smart scenario of intelligent household appliances, “innovation center of intelligent household appliance software” will be co-built to boost the application of domestication smart IoT operating system in the household appliances industry, improve high-end and smart household appliances industry technology innovation level and product competitiveness of China, and build Chinese scheme to form industrial and national standard.

The three parties will integrate their strengths during the strategic cooperation and gradually form smart household appliance core operating system technology innovation system and standard norms, based on intelligent IoT operating system, supported by ecology service and led by scenarized orientation. Three parties will start from OpenHarmony to develop pan-terminal operating systems in household appliance industry in combination with smart security and scenarized technology. Moreover, technology advantages of OpenHarmony and other operating systems will be integrated, and scenarized experience will be taken as the ultimate goal to break through the underlying operating system to form the features of operating system with consistent experience of multi-system and cross-systems; Three parties will jointly promote the

development of operating system application components, chips, modules, development board, complete machine and other kits which are oriented to the household appliance field to form a kit of solution for household products from non-intellectualization to intellectualization or low-end intellectualization to high-end intellectualization or from end to end.

In the agreement, the Company will partner with SZ Kai Hong and Qingdao Guochuang to co-build “Innovation Center of Intelligent Household Appliance Software” oriented to domestic and international household industry to boost new development of household appliance industries of high-end, intelligentized and scenarized orientation. This marked the strategy of multi-level business structure since the Company established AIoT Business Group, (leveraging products and solutions as entry point for ecosystem business to enlarge core business) for products businesses to achieve mutual development and comprehensive increase of multi-level full-stack business. Prospectively casting insights into the future, the Company will persistently combine the accumulated experience of SZ Kai Hong in the OpenHarmony technology, give play to the important role of SZ Kai Hong for business, stimulate ecology service business via business, expand new industrial market space and quicken the smart transformation process in various industries.
